### **Overview**

Apacer's UDM2A-M LP 90D (Type E) is a high performance, highly reliable, high endurance USB2.0 flash disk module in a small form factor designed for embedded applications and the system as a boot drive. As a embedded flash storage, it's compliant with USB2.0 and backward compliable with USB1.1, and connects to the host system via a 10-pin connector. The 10-pin USB connector on the Type E with pitch size 2.00 mm could perfectly fit in low profile system.

\*The actual available memory on the device is less than what is listed on the package. This is due to small discrepancies in file formats and algorithms used by various operating systems. In addition, a portion of memory space is reserved for system files and data sectors for better performance.

## Feature

- Built-in hardware ECC
- Global wear-leveling
- · Flash bad-block management
- S.M.A.R.T.
